

On

“On” is an original seating system for various kinds of spaces. It is a seat that inspires and gives shape to the most varied aesthetic and functional experiences: communal, collaborative, training and transit spaces. The simple shape of the seat allows countless colour solutions and encloses a system with “patent pending” for movement management and lifting adjustment.

Switch On wellbeing

“On” is a project that encourages an active and dynamic seating position. An invisible system, concealed in the original disc seat, allows a 3D movement that guarantees the utmost stability while stimulating the mind and the body. With its 360° movement, the “On” seat allows the user to find the most comfortable upright position. It follows the body when it moves and keeps it active by stimulating the muscles.

Switch On technology

“On” features minimalist lines and invisible technology with no visible connecting elements or mechanical coupling elements. In the adjustable versions, the “On” seat acts as a lever for height adjustment: when a slight upward pressure is exerted on any point of the seat bottom, a gas-lift device is activated that allows the user to adjust the chair to different heights according to needs thanks to a perfectly integrated system.

Switch On creativity

“On” is not only comfortable. The “On” seat is a furnishing accessory that encourages creativity and offers countless modular solutions, starting from a single element: the seat. “On” can be fully customised in the colours of plastic elements and the seat upholstery, available in a wide range of fabrics and colours. A simple hooking system allows “On” to be attached to any type of base, thus meeting the most varied functional needs: a fixed stool with 4 legs, a height-adjustable stool, stackable seats, benches with and without a backrest, and sectional and modular systems for meetings, etc.
