

Milos

Timeless elegance

sitland

Essential beauty

Milos is a family of chairs designed by the skilful and creative hands of Dorigo Design, characterised by minimal and refined lines, with or without armrests, always enveloping and comfortable.

Thanks to their decisive and versatile character, which lends itself to numerous interpretations while maintaining a design aesthetic that is always coherent, Milos chairs are ideal both at home and in professional or public environments.

The historic collection is enriched now with two new solutions, Milos Lounge and Milos Tailor.

Dorigo

Design Dorigo Design studio was founded by Fiorenzo Dorigo in 1992, and it operates in the fields of industrial, furniture, product and interior design.

Fiorenzo was born in Treviso, Italy, in 1953 and started working on design and creative direction for the furniture industry in 1975, whilst studying art and design in Venice. He is a member of ADI (Industrial Design Association) and has been an independent designer since 1987.

His projects have won several international prizes and awards including Good Design Awards, Red Dot Award, BigSee and Index Dubai Award.

Seeking beauty and innovation rather than trends, Dorigo Design projects explore concepts that not only look good but that also feel and work well: a practical and thoughtful no-nonsense design, characterised by sharp and crisp lines, sensible details, quality and durability.

Comfort and refined details

Characterized by elegant and smooth lines as its ancestor, Milos Lounge features a generous seat enhanced by a double padded cover for higher comfort.

Optional armrests and the different possible bases - wood, 4-feet, 4-star - make it perfect for lounge areas, but also for the hybrid spaces of the contemporary office and domestic spaces.

Solid wood elements, mono-coque made of bio-polyurethane and recycled and recyclable upholstery, applied without the use of glue, are the ingredients of this comfort and environmentally friendly lounge chair.

Milos Lounge can be combined with Rest table collection, whose design recalls the elegant lines of the wooden base. Available in two finish-es for the base (Beech natural and black paint-ed) and in two sizes, they are the perfect complement for an intimate and essential space.

Versatility and customisation

From the playful soul of Milos Elle comes Milos Tailor, a seat with a painted steel profile, upholstered by removable supporting fabric, suitable for both indoor and outdoor environments.

The upholstery of Milos Tailor can be easily removed thanks to practical zips.

This allows the fabric to be replaced or cleaned, extending the product's life cycle.

Playing with a wide selection of colours and upholsteries, Milos Tailor is a highly customisable and versatile solution that easily fit in different types of environments.

The range is made up of two models (4 legs and stool) and can be easily combined with the Bistrot table family, available with painted steel base, three heights and table top in several finishes.

Comfort with a sustainable soul

Milos Lounge was conceived with a focus on sustainability and product circularity.

The monocoque seat is made of an innovative bio-polyurethane, composed of agro-food waste.

Milos Lounge has been developed to be completely disassembled and recycled in all its components: fabric and armrests are applied without the use of glue and can be easily replaced, giving the product a second life.

The recyclable fabrics made from recycled materials, such as plastic bottles, completes the offer for a totally eco-sustainable solution.

	kg	%
Bio-Polyurethane	2,7	19,82
Steel	7,106	52,16
Wood	2,6	19,08
Plastic	0,018	0,13
Upholstery	1,2	8,81
	13,624	100
